

VersiControl™ RGB Fixed Color Selection Module

Features

- The color selection module can provide a single color lighting option without limiting the color to only red, green, blue or white.
- The color module allows for the selection of a single color from the whole RGB color spectrum.
- Ideal for applications where a specific color is needed to match a design scheme.
- Factory programming ensures the same color is used every time and eliminates the need for field programming.

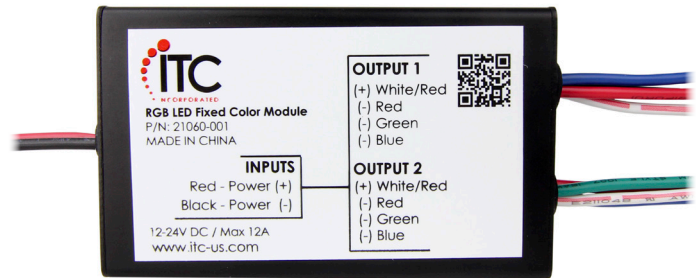

Product Details

Housing	Aluminum
Input Voltage	12-24V DC
Current	12A Max* 4A Max per RGB Wire
IP Rating	IP50
Operating Temp.	-20°C to 50°C
Dimmable	No

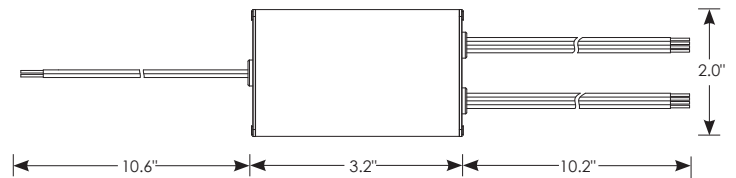

Part Number: 21060-XXX*

* For color options please contact your ITC sales representative
